

Rebate Dashboards

Rebate Survey Dashboard

Effective November 8, 2023, CVRP is closed to new applications.

Applications submitted on or after September 6, 2023, were placed on a standby list. For more information, view the standby list FAQ. If you missed out on CVRP, several EV incentives are still available.

[Rebate Survey Dashboard](#)

This dashboard reflects data from consumers who purchased or leased an eligible clean vehicle, received a rebate, and responded to a voluntary CVRP Consumer Survey. The dashboard also contains a notes tab with more detailed information about the survey, its representativeness, and the functionality of the tool.

If you are interested in a more detailed, question-by-question summary of the first edition of the CVRP EV Consumer Survey, please see "[Summary Documentation of the Electric Vehicle Consumer Survey, 2013-2015 Edition](#)".

Contact transparency@energycenter.org if you have any questions.

Rebate Importance

Survey Question: "How important was the state rebate (CVRP) in making it possible to acquire a plug-in electric vehicle (PEV)?"

Comments: Rebate Importance by Survey Edition. This chart displays how respondents answered the question “How important was the state rebate (CVRP) in making it possible to acquire a plug-in electric vehicle (PEV)?” from four Survey Editions: 2013–15, 2015–16, 2016–17, and 2017–20. The chart displays results as a percentage by rebate importance for each survey edition - “Not at all important”, “Slightly important”, “Moderately important”, “Very important”, and “Extremely important”.

***Notes:** Please note that non-responses and the answer value "Prefer not to answer" are excluded from all charts on this page. Due to rounding, the percentage totals in all figures may not always add up to 100%. Please select the "Notes" tab of this dashboard for additional details and links to related information.
